

Neural Networks

AutoKeras - ML Training

Discord Link in Description

AutoKeras

- Machine Learning to find the best model and parameters
- Transfer Learning
- We only need our dataset and we can get the best possible model

```
autokeras.ImageClassifier(  
    num_classes=None,  
    multi_label=False,  
    loss=None,  
    metrics=None,  
    project_name="image_classifier",  
    max_trials=100,  
    directory=None,  
    objective="val_loss",  
    tuner=None,  
    overwrite=False,  
    seed=None,  
    max_model_size=None,  
    **kwargs  
)
```
